Lanchana Ganesh Naik

Junior Software Engineer | React.js & React Native

Bangalore, India | +91 80955 12810 | lanchananaik@gmail.com
github.com/LanchuNaik | linkedin.com/in/lanchananaik

Professional Summary

Junior Software Engineer experienced in developing web and mobile applications using React.js, React Native, and TypeScript. Skilled in REST API integration, state management, real-time communication, and payment gateway integration. Experienced in contributing to production applications across fintech, civic-tech, agriculture, and event management domains.

Technical Skills

Languages	JavaScript (ES6+), TypeScript
Frontend	React.js, React Native, HTML5, CSS3
State Management	Redux Toolkit, Zustand, React Query
Backend	Node.js, Express.js
Database	MongoDB
APIs & Integrations	REST APIs, Axios, Stripe, Firebase
Real-Time	WebSockets, Socket.io
UI Frameworks	Material UI, Tailwind CSS
Authentication	JWT, OTP-based authentication
Tools	Git, GitHub, GitLab, Figma, Postman

Professional Experience

Junior Software Engineer
Oct 2025 – Present

DigiTalentio IT Solutions — Bangalore, India

- Develop and maintain production web and mobile applications using React.js, React Native, and TypeScript across multiple client projects.
- Integrate Stripe payment workflows and QR-based tipping features for a multi-role fintech platform, including OTP-based user verification.
- Implement real-time chat and notifications using Socket.io and Firebase, supporting communication and updates across application workflows.
- Manage UI state and role-based navigation using Redux Toolkit and Zustand, while developing reusable components for consistent interfaces.

Software Development Intern
May 2025 – Oct 2025

DigiTalentio IT Solutions — Bangalore, India

- Implemented application screens and UI features for web and mobile products, translating design requirements into functional components.
- Connected frontend components to REST APIs using Axios and handled API responses to support application workflows.
- Contributed to JWT authentication and OTP verification flows, gaining hands-on experience with application security and frontend integration patterns.

Key Projects (Professional)

Tipsy — Multi-Role Tipping & Payment Platform (USA)
2026

React.js • TypeScript • Redux Toolkit • Stripe • Firebase

- Developed role-based dashboards for customers, staff, and business owners, with protected routing and role-specific data access.
- Integrated Stripe payment workflows and QR-based tipping, along with OTP authentication.
- Managed application state using Redux Toolkit to support data sharing across dashboard components.

Celebrity Calendar — Event & Booking Mobile App
2026

React Native • Redux Toolkit • Firebase • Axios

- Developed cross-platform mobile app features for event discovery, booking, and calendar-based workflows.
- Integrated Firebase Cloud Messaging for booking updates and event reminder notifications.
- Implemented role-based navigation for celebrities, managers, and team members.

e-Beru — Agricultural Multi-Role Platform 2025

React.js • Redux Toolkit • React Query • Socket.io

- Developed separate dashboards for farmers, consultants, and administrators with role-specific access and data views.
- Implemented real-time chat and notifications using Socket.io to support communication between platform users.
- Used React Query for server-state caching and data fetching to reduce unnecessary API requests.

Prajaakeeya — Civic Voting & Engagement Platform prajaakeeya.org 2025

React.js • TypeScript • Zustand • Firebase

- Developed features for a multi-role civic platform supporting administrators, candidates, and voters, including voting and issue reporting workflows.
- Implemented multilingual support and responsive layouts to improve accessibility across devices and language preferences.

Personal Projects

Rentr — Peer-to-Peer Rental Marketplace 2026

React Native • Node.js • Express.js • MongoDB • Socket.io • JWT

- Developed a rental marketplace with booking workflows, booking conflict detection, real-time chat, and user reviews.
- Implemented JWT-based authentication, REST API endpoints, and location-based property search using MongoDB geospatial queries.

Education

Master of Computer Applications (MCA) 2023 – 2025
Dayananda Sagar College of Engineering, Bangalore CGPA: **9.91 / 10**

Bachelor of Science — Physics, Chemistry & Mathematics 2019 – 2022
Anjuman College for Women, Bangalore Score: **92%**
